

Hauling optimum loads is the most direct route to maximum profitability. The Precision Load digital on-board weighing system will take the guess work out of the equation.

We make it simple. The uncomplicated, user-friendly cab mount display unit is compact and powerful. The digital sensors are manufactured in a certified "clean room" environment to strict ISO 9000 standards. That extra attention to quality control makes life simpler for owners and operators: less wasted time and money spent on downtime and service calls.

RICE LAKE

Rice Lake Weighing Systems is an international leader in the manufacture and distribution of weight-related products and process-control equipment. Within this ISO 9001 registered company, progressive new technologies merge with the wisdom of industry experience and create the future of weighing through cutting-edge research and design.

Our roots are planted firmly in the principles of quality and customer service. Through three generations of family ownership these ideals remain unchanged. Today, Rice Lake Weighing Systems is world renowned for delivering the highest standard of product and the best service in the weighing industry.

We continue our dedication to being the best by every measure—from community involvement to global commitment, and the promotion of ethical business practices that represent the values of our customers, our employees and our company.

The Precision Loads On-Board Weighing System

fits all front or rear loaders, roll-offs, transfer trailers and liquid tankers

The Precision Loads On-Board Weighing System can be mounted in a variety of ways to fit your vehicle and adapt to your system operating requirements. We will help you select the right options for your rigid or tipping straight frame trucks. For liquid tank and transfer trailers, we offer sensor options for pivot point, leaf spring and air-ride suspensions.

Our simple, step-by-step installation manual guides the installer through the sensor mounting process to ensure optimum safety and precision of the weighing system. Add to that our five-year warranty against sensor breakage for a win/win, on-board weighing system every waste hauler should have.

Six Point Under-Body Load Cell Kit

Precision Loads™
RICE LAKE

The configuration of the Precision Loads On-Board Weighing System usually requires four (or six) load sensors, single-sealed junction box, and cab-mount display, all digital connections. Peripheral equipment, printers, GPS and data communications integration, limit alarms, and several operating programs are available options.
