Quality construction

The SPC series scale is constructed with industrial quality components throughout to guarantee trouble-free operation under demanding conditions. The sturdy stainless steel housing and tactile keyboard are splash proof and USDA accepted.

Easy to read

The large (0.55") LCD display is easy to read under any lighting condition, whether standing up or sitting down. Weights are displayed within a fraction of a second.

Tactile keyboard

The keyboard has three tactile keys that are used to reset the scale to zero (or enter a tare value), change the unit of weight and to turn power on and off.

Dimensions

Flexible

A "dual-range" system used in these scales permits fine weight readings in increments as small as 1 g and 0.1 lb. Switch between lb and g at the push of a button. Switch between fractional lb, decimal lb and decimal ounce settings at the flip of a switch.

The same weight displayed in four different modes:

896 grams

1.975 pounds

31.6 ounces

1 pound 15 and 5/8 ounces
